# Why we recommend Vastu remedies?

In modern living, where the environment at macro level is highly influenced by many factors beyond our control, micro level energy correction done with empowered remedies can effectively bring in and retain health, wealth, harmony and happiness in the life.

Mankind, through out the history has created the rich, culturally specific symbols with a meaning. These symbols impact our subconscious mind which make up about 95% of our mind frame. When these symbols are of specific geometric shape, size, colours and meaning, it results in transforming of energy- the vital force that governs entire universe.

## Paintings and artwork for Vastu corrections?

We all love painting. Painting includes all sort of creative impression. Peoples interest for an art or painting can be said to be as old as history of mankind. Discovery of cave art shows clearly that the love for art has passed from generation to generations. Real purpose of painting has been to communicate a message. During ancient time, the art have been used to express ideas that were not acceptable in the society. Many messages are conveyed through colours, symbols, art work, and also by way of quotes in painting. Many people do not realize how much of a role art plays in our life.

## Why we use crystals in Vastu ?

Crystal are tools for communication, between humans and the earth. It connects our place elements with the earth energies. Crystal stimulates the atmosphere and energy flow, making your space a more enjoyable. One of the main function of crystal is to cleanse and transmute negative energies. When you use a crystal for vastu i.e. your space healing (vastu corrections), the crystal's vibration tunes in to the malfunctioning emissions of the affected area and gently corrects them, making you feel healthier and re-energized.
